

I have a life philosophy – “**First you learn, then remove the L**”. Continuing this, if a passport is required for traveling to another country, education is a prerequisite for a prosperous future. For me, knowledge has always been a priority, and I have always believed that what I study now will undoubtedly find its application in future.

Human is not a robot, and I believe we cannot be continually stressed by the information field. That is why, in addition to my education, I make an effort to maintain my physical fitness. Football and basketball are two sports that help me with this. Since I attended the Irtysh soccer club's academy, I sometimes think that if I hadn't gone to high school, I could have played professional football. By the way, I really enjoy this type of sport, especially when we get together with my close friends and play, creating a friendly atmosphere while also feeling a little competitive. And not to mention a competition, when our nerves were on edge, when the coach yelled "Aldiyar, take your player!" throughout the game, and the wonderful taste of triumph. Keeping with the sports theme, we can't leave out basketball, which came in third after education and football. This pastime was a revelation for me in 2021, when I first watched a National Basketball Association game and was blown away by the game's great pace and the wonderful moments when players displayed their precision and mastery. That's when I began playing basketball, initially on my own and then with my mates at school. I wouldn't say I've progressed much in this sector, but my ambition is to play in a college league and devote myself to this sport as LeBron James, my idol, did. Furthermore, chess is my passion. I've been playing chess for a long time, yet it gets more and more exciting every year. I have a lot of experience in this game, owing to my coach and school, who have allowed me to travel to many locations and compete in tournaments, obtaining valuable experience and, of course, victories.

I'd like to point out that there is a link between my school and Nazarbayev University's missions. After 6 years at my current school, I can confidently claim that my teachers and school assisted me in discovering my potential and developing into the person I am today. There are countless roads ahead of us, but they all fall into one of two categories: stagnation or development. My goal is to grow and progress since life does not stand still. After familiarizing myself with Nazarbayev University's objective, I asked why the subject of computer science in our country is not as established as it is in other countries. Why am I and my relatives exposed to hackers? This is what inspired me to pursue a career in cybersecurity. I will be able to find answers to these problems and contribute to the advancement of modern technology field thanks to Nazarbayev University.
